# AUSPOWER

*your high voltage people*

## PORTABLE SWITCHROOMS

**Auspower's custom built relocatable switchrooms can reduce you project time frames and costs considerably.**

**With a choice of external finishes and styles to suit your needs, our competitively priced switchrooms are fitted out with the highest quality Eaton switchgear and fully tested prior to transportation to the remotest areas.**

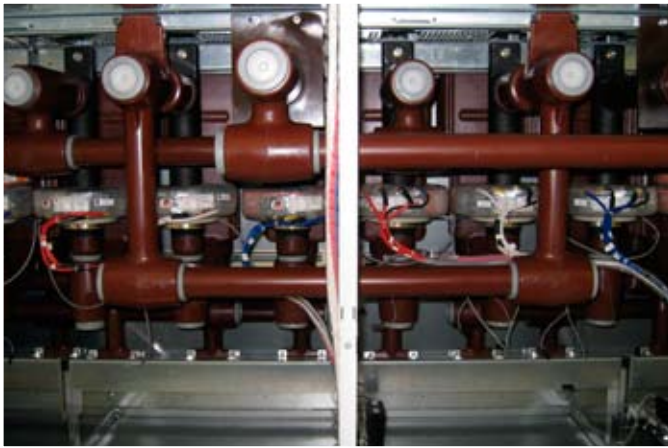

### FEATURES & BENEFITS:

- Fast delivery
- Lower on-site costs
- Custom designed to your specifications
- Durable
- Designed and manufactured in Australia
- Your choice of high quality switchgear
- Complete fitout
- Full testing prior to delivery
- Your choice of décor and external finishes
- Fire rated models
- High wind load rating
- Lightweight truss construction
- Fully insulated
- Air conditioned
- Pier mounted to your specifications
- Internal fitout options including bathroom & plumbing

Time is a major factor in most high voltage projects, our delivery times are some of the shortest in Australia.

# PORTABLE SWITCHROOMS AUSPOWER

Most of the testing and construction of our portable switchrooms is carried out in the Auspower workshop keeping on-site project costs to a minimum. Final test and fit-out are carried out on site by Auspower's high voltage specialists.

Auspower's Relocatable switchrooms have a range of unique features and fitouts. Customised designs or chose from our existing range of colours finishes and internal features.
